

Get more out of your health benefits – 2024

We've got your back

Case management is available to help members manage their health. Case managers are nurses or licensed clinical social workers. They can help:

- Provide education about your health care
- Identify health care needs
- Locate a provider for you or your child
- Work with your primary care provider to help answer medical questions
- Work with your doctors on specialist referrals
- Promote communication between your care provider, family and medical specialists
- Help with home health requests
- Make sure all your health care needs are being met

Children who need more medical or behavioral health needs than other children their age can get special help if they are in a case management program.
